REASONS FOR ALLOWANCE

The prior art does not disclose or fairly suggest a method and device for hair removal that directs electromagnetic energy parallel to a skin surface to impinge on hair protruding therefrom and in a direction into the skin surface to radiate the follicle. U.S. Patent 5,533,266 teaches directing a laser beam parallel to a skin surface to sever hair, but has no laser component directed into the skin surface. U.S. Patent 7,108,690 discloses a hair removal device that directs laser energy into a skin surface for hair removal. Neither prior art reference suggests or implies the combination of the two energy applications.
